Javascript
PHP
React (currently learning)
Django (currently learning)

ABOUT ME

As a recent Information Science graduate, I learned how to think like a programmer, understand the impacts of technology on society and solve problems. I am currently creating more depth to my understanding of programming by self-studying new programming languages and developing web applications on my own. I hope to expand my craft to empower others with technology.

WORK EXPERIENCE

DINING ROOM SERVER

The Smith / Washington D.C. / Jan 2019 - Jun 2019

- Provided guests with valuable insight and information about the food and beverages offered at this dynamic, upscale restaurant
- Focused on making each guest's experience memorable by aligning with the strong core values of the restaurant group
- Supported each member of the team, from chefs to bussers, for optimal efficiency in both the busiest hours and opening/closing

RESEARCH INTERN

Anchor Media Services / New City, NY / Summer 2017

- Identified, researched, and contacted potential clients
- Assisted in creating business development presentations based on competitive analyses
- Completed various administrative tasks, including financial duties and improving CRM based on sales strategy

ADMINISTRATIVE AND MARKETING ASSISTANT

Fairmont Car and Truck Rental / Hackensack, NJ / 2015 - 2017 (seasonally)

- Implemented technology system to create easier workflow and provide better experience and service to customers
- Supported clients in office and via phone to schedule appointments and assist in answering any questions
- Created social media accounts and designed new brochures/posters using Photoshop and Indesign

SNOWBOARD AND SKI INSTRUCTOR

Campgaw Mountain / Mahwah, NJ / 2012 - 2014 (winters)

- Worked in a team of three instructors to teach classes of over 20 students, ranging from beginner to intermediate levels
- Created a fun learning environment to engage and develop skills in kids aged 4-6
- Patrolled for the safety of all skiers and snowboarders
